# **INTRODUCTION**

The Pennsylvania Food Merchants Association (hereafter "PFMA") conducted an analysis of instore handling costs related to fluid milk in 2008. The study was conducted utilizing stores located in the Pennsylvania Milk Marketing Board (hereafter "PMMB") Area 6 being studied. Raw data was obtained by PMMB and PFMA. PFMA has analyzed the raw data. The Cost Replacement Hearing exhibits data has been supervised by Thomas J. Price, CPA.

# **DEFINITIONS**

<u>In-store handling costs</u> - In-store handling costs are defined as costs incurred from the time store personnel receive milk deliveries until the milk product is purchased and checked out at the check-out counter.

The total in-store handling cost is comprised of four separate components, which are personnel costs, building costs, equipment costs, and other operating costs.

<u>Personnel costs</u> - Costs relative to personnel, including salaries, wages, payroll taxes, fringe benefits and group insurance.

<u>Building costs</u> - Costs are comprised of rent, depreciation, and repairs.

<u>Equipment costs</u> - Costs are comprised of rent, depreciation, and repairs.

Other operating costs - Costs are comprised of utilities, telephone, insurance, advertising, bags, supplies, vehicle expense, business taxes, license fees, professional services, bad checks, cash loss, inventory and cash adjustments, G&A allocated from central headquarters, and miscellaneous expenses.

# **CROSS-SECTION**

Stores included in the study are the same stores utilized by the PMMB in its cross-section (see Table 1).

# **SCOPE OF WORK**

The Kirkland formula was used to calculate the in-store handling cost. <u>Table 2</u> presents the Kirkland method of calculating the in-store handling cost for a fictitious, example store.

April 2008 financial information was accumulated for each store in the cross-section and prepared in accordance with Generally Accepted Accounting Principles. The month of April is considered to be a representative month for the industry. <u>Table 3</u> presents the results of the study for the entire cross-section of surveyed stores.

# **METHOD OF CALCULATION**

Financial information was collected and analyzed on a store-by-store basis. The in-store handling cost has two components; a milk handling expense component and a checkout expense component. Each component is calculated by applying allocations based on store area used to store, display and sell milk as well as an allocation of checkout costs based on milk sales as a percentage of total sales.

Milk sales in the cross-section stores selling above the state minimum retail price have been restated to the minimum retail price based on the actual volume and packages sold by the stores. The restatement to the minimum retail price is considered necessary to avoid capturing costs due to any of the stores selling milk at levels higher than the state allowed minimum retail prices.

# **CURRENT COST BASED ON CONSUMER PRICE INDEX**

The cost of handling milk in retail outlets is constantly changing as the personnel, building, equipment and other costs are all subject to change over time. The changes in costs are both a normal and ongoing part of doing business as a retail outlet. We have used the Consumer Price Index for All Urban Consumers (CPI-U) to calculate the change in costs over time and recommend that the CPI-U be used to adjust the in-store handling cost on a monthly basis. We have presented this calculation for the period from April 2017 to October 2017 (see <u>Table 4</u>). The CPI is the most widely used measure of price change. It is both a timely and reliable source of price change data.

The CPI is released monthly about two weeks after the end of the month. Therefore, it should be updated monthly to provide a current and accurate calculation of the cost of handling milk. In Area 6, the PMMB has adopted a policy to adjust the cost using a two-month delay. This means that the index for October 2017 would be used to calculate the December 2017 cost. The delay is acceptable to allow for timely, accurate calculations each month by the staff of the PMMB.

# DEPARTMENTAL GROSS MARGIN COMPARISONS TO MILK

The graph (see <u>Table 5</u>) presents the gross margin by department of a variety of retail stores ranging from single store companies to multi-store companies for the 2016 reporting period representing a geographical area covering a majority of states and territories in the U.S. and Canada. Data was taken from the 2017 "Independent Grocers Financial Survey" report compiled by the National Grocers Association. Information from the study is presented with the gross margins realized by Area 6 retailers purchasing and selling at the minimum wholesale and retail prices.

# STORES INCLUDED IN THE AREA 6 SURVEY FOR IN-STORE HANDLING COSTS

Giant – Eagle #54

Somerset

Red Apple Kwik Fill,

Johnstown

Stem's Clover Leaf Quick Shop,

Johnstown

Uni-mart, Pleasant Gap

Kondak's,

Clarendon

Grocery Stretcher,

Bradford

Martin's General Store,

Alexandria

Fezzel's Market, Punxsutawney

Weis Market,

State College

Nittany Oil Mini Market,

Port Matilda

Quality #626,

Kane

### **EDUCATION**

Bloomsburg University – B.S. Degree in Accounting (1981)

### **EMPLOYMENT**

Herbein + Company, Inc.

October 1994 to Present:

Partner

July 1989 to December 1991:

Manager of Accounting and Auditing Department

July 1986 to July 1989:

Supervisor of Accounting and Auditing Department

July 1984 to June 1986:

Senior of Accounting and Auditing Department

December 1982 to July 1984:

In-Charge of Accounting and Auditing Department

June 1981 to December 1982:

Staff Accountant

### PROFESSIONAL AND CIVIC ASSOCIATIONS AND DESIGNATIONS

CPA – Commonwealth of Pennsylvania (February 1984)

Member – American Institute of Certified Public Accountants

Member – Pennsylvania Institute of Certified Public Accountants

Member – Reading Chapter of Certified Public Accountants

Finance Chairman - Frieden's Lutheran Church

Board Member - Oley Valley Education Foundation

### SPECIFIC RELATED EMPLOYMENT EXPERIENCE

Assisted in the original development of the methodology of analyzing in-store handling costs.

Supervised in-store handling cost studies for Pennsylvania Food Merchants for the period 1987 to 1998.

I have spent over 37 years providing various accounting and tax services for retail manufacturing and service businesses including food industry manufacturers and distributors.
