INTRODUCTION

The Pennsylvania Food Merchants Association (hereafter "PFMA") conducted an analysis of in-store handling costs related to fluid milk. This study was supervised by Thomas J. Price, CPA. The study was conducted utilizing stores located in the Pennsylvania Milk Marketing Board (hereafter "PMMB") Area 4 being studied. Raw data was obtained by PMMB and PFMA. PFMA has analyzed the raw data.

DEFINITIONS

<u>In-store handling costs</u> - In-store handling costs are defined as costs incurred from the time store personnel receive milk deliveries until the milk product is purchased and checked out at the check-out counter.

The total in-store handling cost is comprised of four separate components, which are personnel costs, building costs, equipment costs, and other operating costs.

<u>Personnel costs</u> - Costs relative to personnel, including salaries, wages, payroll taxes, fringe benefits and group insurance.

<u>Building costs</u> - Costs are comprised of rent, depreciation, and repairs.

<u>Equipment costs</u> - Costs are comprised of rent, depreciation, and repairs.

Other operating costs - Costs are comprised of utilities, telephone, insurance, advertising, bags, supplies, vehicle expense, business taxes, license fees, professional services, bad checks, cash loss, inventory and cash adjustments, G&A allocated from central headquarters, and miscellaneous expenses.

CROSS-SECTION

Stores included in the study are the same stores utilized by the PMMB in its cross-section. These stores are deemed to be representative of stores in PMMB Area 4 (see Table 1).

SCOPE OF WORK

Financial and other store information was accumulated for use with the worksheet illustrated in <u>Table 2</u>. The financial information analyzed for each store, using the month of November 1999, was prepared in accordance with generally accepted accounting principles. The month of November is considered to be a representative month for the industry.

METHOD OF CALCULATION

Financial information was collected and analyzed on a store-by-store basis. The total milk handling expense per quart was calculated to be the Total Milk Expense (which is calculated by taking the total store expenses and multiplying them by the ratio of milk sales to total sales) divided by total quarts (see <u>Tables 3 and 4</u>).

WEIGHTING FOR PRICE DIFFERENTIALS

The methodology applied requires the calculation of a milk sales-to-sales ratio. Due to significant increase in milk prices from April 1999 to November 1999, an equalizing adjustment has been applied in order to eliminate distortions caused by these price fluctuations (see <u>Tables 4 and 6</u>).

CURRENT COST BASED ON CONSUMER PRICE INDEX

The cost of handling milk in retail outlets has changed since the above methodology was employed to measure the cost as of November 1999. The changes in cost are both a normal and ongoing part of doing business as a retail outlet. We have used the Consumer Price Index for All Urban Consumers (CPI-U) to calculate the change in costs for the time period from November 2013 to August 2014 (see <u>Table 5</u>). The CPI is the most widely used measure of price change. It is both a timely and reliable source of price change data. The CPI is released monthly within two weeks after the end of the month. Therefore, it should be updated monthly to insure a current and accurate calculation of the cost of handling milk. The PMMB has adopted a policy to adjust the amount using a two-month delay. This means that the index for August would be used to calculate the October cost. The delay is acceptable to allow for timely, accurate calculations each month by the staff of the PMMB.

DEPARTMENTAL GROSS MARGIN COMPARISONS TO MILK

The graph (see <u>Table 7</u>) presents the gross margin by department of a variety of retail stores ranging from single store companies to multi-store companies for the 2013 reporting period representing a geographical area covering 38 states and 2 Canadian provinces. Data was taken from the 2014 "Independent Grocers Financial Survey" report compiled by the National Grocers Association. Information from the study is presented with the gross margins realized by Area 4 retailers purchasing and selling at the minimum wholesale and retail prices.

Finance Chairman - Frieden's Lutheran Church

Board Member - Frieden's Lutheran Church

Board Member – Thrivent Financial for Lutherans

SPECIFIC RELATED EMPLOYMENT EXPERIENCE

Assisted In the original development of the methodology of analyzing in-store handling costs.

Supervised in-store handling costs studies for Pennsylvania Food Merchants for the period 1987 to 1998.

I have spent over 33 years providing various accounting and tax services for retail manufacturing and service businesses including food industry manufacturers and distributors.
